

1. These **Exceptional Regulations** to the BRUSSELS HOLIDAY FAIR are an attachment to the Terms and Conditions and the General Regulations and is entirely part of it. The exhibitor declares and recognizes having taken note of the documents mentioned above.
2. The BRUSSELS HOLIDAY FAIR takes place in the Halls of BRUSSELS EXPO. Like every other fair, she aims to attract international and national touristic regions, tour operators and travel agencies. The fair aims to connect exhibitors with visitors who are interested in the products and services they represent. The BRUSSELS HOLIDAY FAIR targets 2 audiences: professionals in the sector and the bigger public. The BRUSSELS HOLIDAY FAIR attracts visitors from all Belgian regions.
3. **BRUSSELS HOLIDAY FAIR** is organised by FISA OPERATIONS NV, with a head quarter in Brussels: Square Atomium BP 505, 1020 Brussels ("**FISA OPERATIONS**"). All invoices addressed to the exhibitors of the BRUSSELS HOLIDAY FAIR are distributed by FISA OPERATIONS.
4. The website of the BRUSSEL HOLIDAY FAIR can be found here: [www.brusselsholidayfair.eu](http://www.brusselsholidayfair.eu)
5. **Modular booth constructions** are allowed at the BRUSSELS HOLIDAY FAIR.
6. Booths may not be closed off more than 50% per open side.
7. The **height** of the **dividing walls** are set **at 2.5 meters**. Booths with a different height than 2.5 meters, must be submitted for approval to the Organizing Committee. The height can only deviate from the standard height with approval of the Committee. The back side of the dividing walls that extend the normal dimensions, must be perfectly shielded by the exhibitor who builds lower or higher than 2.5 meters. Every exhibitor must provide for their own walls. Exhibitors who would like to build lower or higher, must submit a stand concept with clear mentions of the dimensions. The part of the booth that surpasses the height of the neighbouring booth, must also be shielded.
8. The exhibitor is required to provide enough lighting on his booth depending on his surface. **1 spot per 3 square meters** is an average recommendation. When you order electrical connections, you need to keep in mind that you calculate enough power for lighting in the booth and the functioning of other electrical devices. FISA OPERATIONS prohibits all forms of overexposure on your booth.
